

PRESS RELEASE (For Immediate Release)

**TallApplications Introduces PDF/Mergician 2.0**  
*New levels of advanced mail merging using PDF forms*

(February 23, 2006) – TallApplications, a leading provider of creative PDF solutions, announced today the release of PDF/Mergician 2.0, an easy to use application for generating advanced mail merges using PDF forms.

PDF/Mergician enables you to create personalized mailings and reports using PDF forms as templates and supports advanced mail merge scenarios. With PDF/Mergician, you can import data from any database, apply master/detail relations to documents, and export the results to multiple outputs. PDF/Mergician can be run as an end user application, unattended (such as part of a nightly batch), or as web service.

Version 2.0 brings many new and exiting features to PDF/Mergician, such as visual field binding, print and fax support, creation of form fields, document signing, PDF creation from any Windows application and much more.

With PDF/Mergician 2.0, there is no need to use other PDF tools such as Adobe Acrobat. The included Free PDF/Printer allows you to easily create PDF documents.

PDF/Mergician 2.0 is compatible with project files created in earlier versions of PDF/Mergician and runs on Windows 2000, Windows XP, or Windows Server 2003.

PDF/Mergician 2.0 is available now. A free trial version of PDF/Mergician can be obtained from [www.tallapplications.com](http://www.tallapplications.com).
